FetHead Germanium

Philosophy FetHead Germanium is high quality, in-line microphone preamplifier. It provides improved sound for Dynamic and Ribbon microphones. Small, compact, but powerful, Fethead Germanium utilizes tried and true FET technology combined with a hand selected "New Old Stock" Germanium transistor to deliver 29dB's of Germanium Flavoured boost.

Operation Your Fethead Germanium will inconspicuously latch straight onto any XLR equipped microphone and runs on phantom power, it's ready for use with any type of Phantom powered setup.

Recommended application FetHead Germanium is recommended in the following situations:

- Adding Germanium mojo to your signal chain
- Recording direct into a DAW interface
- Mixers/preamps that negatively impact the sound at higher gain setting
- Adding punchy midrange focus to the sound source

USER GUIDE

Circuit topology FetHead Germanium utilizes an integrated jFet-Germanium transistor circuit, which reveals every detail and infuses it with Germanium harmonics. A low impedance output buffer provides output drive to long cables.

Features

- Hybrid Jfet-germanium amplifier
- 29 dB amplification
- Low impedance output buffer
- Germanium mojo
- freq. response 40hz-100khz (+/- 1dB)
- Z-in 2.2K Ohm
- 48V phantom power

Dimensions

height: 3'/76mm
width: 0,86'/22mm
