1 General information

This user manual contains important information on the safe operation of the device. Read and follow all safety notes and all instructions. Save this manual for future reference. Make sure that it is available to all persons using this device. If you sell the device to another user, be sure that they also receive this manual.

Our products and user manuals are subject to a process of continuous development. We therefore reserve the right to make changes without notice. Please refer to the latest version of the user manual which is ready for download under <u>www.thomann.de</u>.

1.1 Further information

On our website (<u>www.thomann.de</u>) you will find lots of further information and details on the following points:

| Download | This manual is also available as PDF file for you to download. | |
|-----------------------|---|--|
| Keyword search | Use the search function in the electronic version to find the topics of interest for you quickly. | |
| Online guides | Our online guides provide detailed information on technical basics and terms. | |
| Personal consultation | For personal consultation please contact our technical hotline. | |
| Service | If you have any problems with the device the customer service will gladly assist you. | |

1.2 Notational conventions

This manual uses the following notational conventions:

LetteringsThe letterings for connectors and controls are marked by square brackets and italics.Examples: [VOLUME] control, [Mono] button.

Texts and values displayed on the device are marked by quotation marks and italics. **Examples:** '24ch', 'OFF'.

digital speaker management system

Displays

| Text input | Text inputs that are carried out on the device are indicated by typewriter font. Example: 2323 |
|--------------|--|
| Instructions | The individual steps of an instruction are numbered consecutively. The result of a step is indented and highlighted by an arrow. |
| | Example: |
| | 1. Switch on the device. |
| | 2. Press [Auto]. |
| | \Rightarrow Automatic operation is started. |
| | 3. Switch off the device. |

1.3 Symbols and signal words

In this section you will find an overview of the meaning of symbols and signal words that are used in this manual.

| Signal word | Meaning |
|---------------|--|
| DANGER! | This combination of symbol and signal word indicates an immediate dangerous situation that will result in death or serious injury if it is not avoided. |
| NOTICE! | This combination of symbol and signal word indicates a possible dangerous situation that can result in mate- rial and environmental damage if it is not avoided. |
| Warning signs | Type of danger |
| | Warning – danger zone. |

2 Safety instructions

Intended use

This device is intended to be used for amplification, mixing and playback of signals from musical instruments and microphones. Use the device only as described in this user manual. Any other use or use under other operating conditions is considered to be improper and may result in personal injury or property damage. No liability will be assumed for damages resulting from improper use.

This device may be used only by persons with sufficient physical, sensorial, and intellectual abilities and having corresponding knowledge and experience. Other persons may use this device only if they are supervised or instructed by a person who is responsible for their safety.

Safety

DANGER!

Danger for children

Ensure that plastic bags, packaging, etc. are disposed of properly and are not within reach of babies and young children. Choking hazard!

Ensure that children do not detach any small parts (e.g. knobs or the like) from the unit. They could swallow the pieces and choke!

Never let children unattended use electrical devices.

NOTICE!

Risk of fire

Do not block areas of ventilation. Do not install the device near any direct heat source. Keep the device away from naked flames.

NOTICE!

Operating conditions

This device has been designed for indoor use only. To prevent damage, never expose the device to any liquid or moisture. Avoid direct sunlight, heavy dirt, and strong vibrations.

Only operate the device within the ambient conditions specified in the chapter 'Technical specifications' of this user manual. Avoid heavy temperature fluctuations and do not switch the device on immediately after it was exposed to temperature fluctuations (for example after transport at low outside temperatures).

Dust and dirt inside can damage the unit. When operated in harmful ambient conditions (dust, smoke, nicotine, fog, etc.), the unit should be maintained by qualified service personnel at regular intervals to prevent overheating and other malfunction.

NOTICE!

Possible damage due to installation of a wrong fuse

The use of different types of fuses can cause serious damage to the unit. Fire hazard!

Only fuses of the same type may be used.

DSP 204, DSP 206, DSP 306, DSP 408

3 Features

- Digital mixer
- Inputs:
 - DSP 204 (item no. 435191): 2 mono channels (XLR chassis sockets) for signals with line level
 - DSP 206 (item no. 435192): 2 mono channels (XLR chassis sockets) for signals with line level
 - DSP 306 (item no. 435193): 3 mono channels (XLR chassis sockets) for signals with line level
 - DSP 408 (item no. 435194): 4 mono channels (XLR chassis sockets) for signals with line level
- Outputs:
 - DSP 204 (item no. 435191): 4 mono channels (XLR chassis plugs) for signals with line level
 - DSP 206 (item no. 435192): 6 mono channels (XLR chassis plugs) for signals with line level
 - DSP 306 (item no. 435193): 6 mono channels (XLR chassis plugs) for signals with line level
 - DSP 408 (item no. 435194): 8 mono channels (XLR chassis plugs) for signals with line level
- Comprehensive setting options for optimal sound:
 - Parametric equalizer
 - Graphic equalizer
 - High- and low-pass filters
 - Noise Gate
 - Limiter
 - Phase inversion
- USB port for computer control using the supplied software
- D-Sub socket for remote control or for the cascading of several devices
- Network connection for integrating the device in a local network
- Operation of the device via buttons, jog wheel and display

4 Installation and starting up

Unpack and check carefully there is no transportation damage before using the unit. Keep the equipment packaging. To fully protect the product against vibration, dust and moisture during transportation or storage use the original packaging or your own packaging material suitable for transport or storage, respectively.

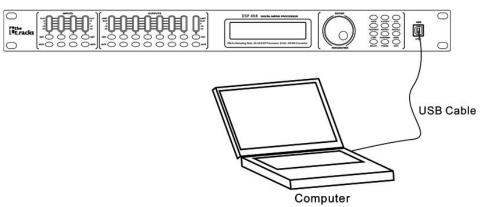

Create all connections while the device is off. Use the shortest possible high-quality cables for all connections. Take care when running the cables to prevent tripping hazards.

The unit has been designed for rack mounting in a standard 19-inch rack; it occupies one rack unit.

Configuration example 1

Rack mounting

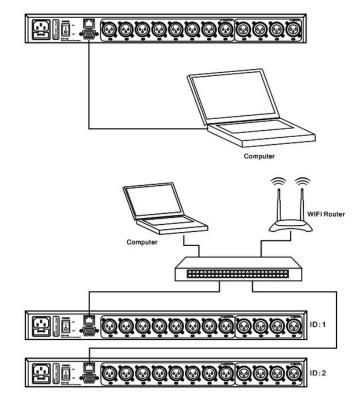

The figure schematically shows how the device can be controlled via a computer's USB port.

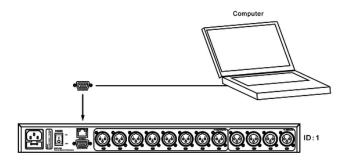

Configuration example 2

The illustrations show schematically how one device or several devices can be integrated into a local area network (LAN).

Configuration example 3

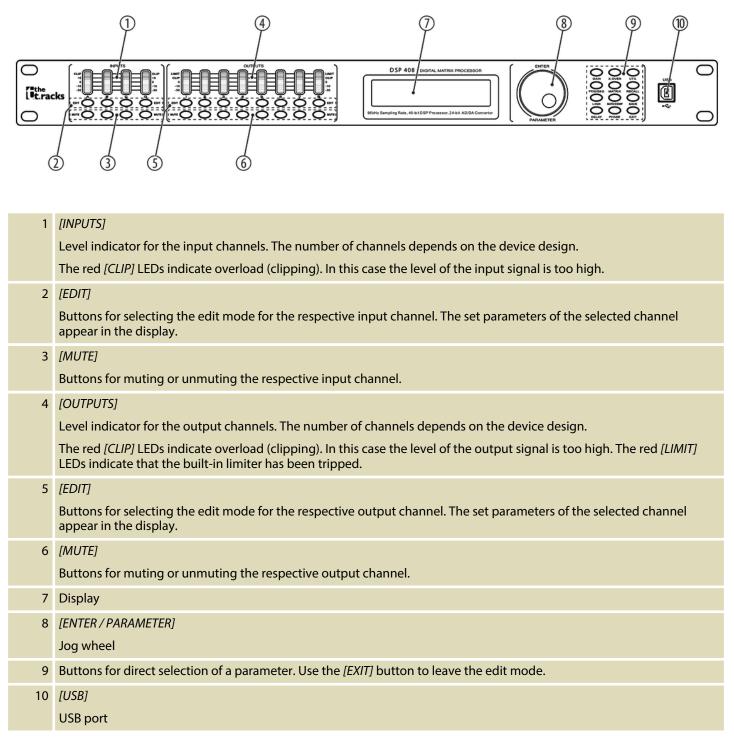

The illustrations show schematically how a device can be configured via the serial port.

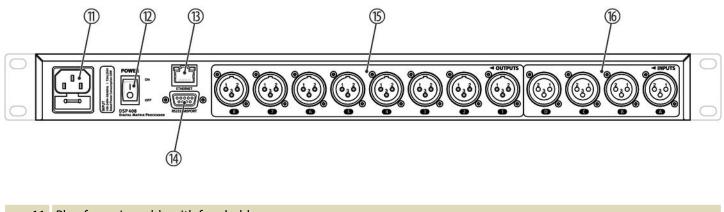

5 Connections and controls

Front panel

tnomann

Rear panel

| 11 | Plug for mains cable with fuse holder |
|----|---|
| 12 | [POWER] |
| | Main switch. Turns the device on and off |
| 13 | [ETHERNET] |
| | RJ45 socket as a LAN port to connect with your network |
| 14 | [RS232/485PORT] |
| | D-Sub socket for remote control or for the cascading of several devices |
| 15 | [OUTPUTS] |
| | XLR chassis plugs for the output channels. The number of channels depends on the device design. |
| 16 | [INPUTS] |
| | XLR chassis sockets for the output channels. The number of channels depends on the device design. |
| | |

6 Operating on the unit

| operation. After | | e to the power grid and turn it on with the main switch to start few seconds, the display indicates that a reset is in progress. The dy for use. The display shows the model name and the user preset tive. | | |
|---|---|--|--|--|
| | The device can only via USB, LAN or the s | be operated directly with the buttons if it is not being controlled serial interface. | | |
| | The buttons that can currently be used light up continuously, and the most previously used ones flash on and off. Buttons that cannot be used at the moment remains dark. | | | |
| Default settings | | | | |
| 1. Keep pressing [UTIL] until the parameter you want appears in the display. | | | | |
| The table below shows the available parameters and their ranges. | | | | |
| | 2. Use the jog wheel to set the desired value of the parameter. Press the jog wheel to confirm. | | | |
| | 3. Press <i>[EXIT]</i> . | | | |
| | | | | |
| Parameter | Selection range | Meaning | | |
| 'ID Number Select' | '1' '254' | Unique identification of the device when connected serially (in a cascade configuration). If several devices are connected seri- ally, each of them must have a unique ID number. | | |
| (Manual ID Cat/ | | If the device is composited to a local potypyly its ID address con | | |

| | | ally, each of them must have a unique to humber. |
|-----------------------|--|---|
| 'Manual IP Set' | | If the device is connected to a local network, its IP address can be set individually. The initial IP address is 192.168.1.101. |
| 'Unit Lock PassWord' | '0000' 'ZZZZ' | Four-character device password. Any combination of letters or numbers can be set. The initial password is 1234. |
| 'Input Source Select' | 'ANALOG INPUT' , 'PINK NOISE' , 'WHITE NOISE' , 'SINE xx' | Selection of the signal source: Either the analogue inputs or the internal test tone generator. The test tone generator can produce either: pink noise, white noise or a sine wave of 20 Hz20 kHz. |
| 'Copy CH select' | | Copies the settings from one channel to another. |
| 'Delay Units Select' | 'ms' , 'm' , 'ft' | Selects the unit for displaying the delay: Milliseconds, metres or feet. |

| User presets | All device settings can be saved in up to 20 different user presets and then recalled as needed. That way you can easily restore your settings for different rooms or stage set-ups. |
|---------------------|--|
| Save use preset | 1. Press [SAVE]. |
| | ⇒ The 'Store Preset' menu opens. |
| | 2. Use the jog wheel to select a user preset between 'U01' and 'U20'. Press the jog wheel to confirm. |
| | 3. Using the jog wheel, enter the name of the user preset by changing the Default Preset standard value. |
| | \Rightarrow The settings are saved. |
| | 4. Press [EXIT]. |
| Call up user preset | 1. Press [RECALL]. |
| | ⇒ The <i>'Load preset'</i> menu opens. |
| | 2. Use the jog wheel to select a user preset between 'U01' and 'U20' or the basic setting 'F00'. Press the jog wheel to confirm. |
| | \Rightarrow The settings are loaded. |

Input settings

- **1.** Press the *[EDIT]* button assigned to the desired channel.
 - ⇒ The settings menu for the desired channel will open. The display shows 'GAIN'.
- **2.** In the basic state of the menu, you can set the level of the channel within a range of -60 dB...+12 dB using the jog wheel.
- **3.** Press the respective button to set further parameters for the channel.

Use the jog wheel to set the desired value of the parameter. Press the jog wheel to confirm.

The table below shows the available parameters and their ranges.

| Param- eter | Button | Selection range | Meaning |
|----------------|------------------|--|---|
| 'PEQ' | 1 × [PEQ/GEQ] | <pre>'PEQ': '1' '9' 'F': '20Hz' '20kHz' 'Q': '0.4' '128' 'G': '-12dB' '+12dB' 'Style': 'PEAK', 'L-SHLF', 'H-SHLF', 'LP6dB', 'LP12dB', 'HP6dB', 'HP12dB', 'A-PAS1', 'A-PAS2' 'ON', 'BP'</pre> | For 9 frequency bands (numbered with the parameter ' <i>PEQ</i> '), the parameters of the para- metric equalizer can be set individually: Centre frequency, filter quality, slope, filter type, bypass |
| 'GEQ' | 2 × [PEQ/GEQ] | 'Freq': '20Hz' '20kHz' 'Gain': '-12dB' '+12dB' | Graphic equalizer parameters: The frequency range is divided into 31 fixed preset areas (numbered with the parameter <i>'GEQ'</i>), which can be set separately for boost or cut. |
| ʻINLINK' | [LINK] | | The settings of several input channels can be linked to each other. The number of input chan- nels depends on the device design. |
| 'DELAY' | [DELAY] | '0ms' '680ms' '0m' '234m' '0ft' '766ft' | Delay time. The units that are displayed depends on the device's default setting. |
| 'X-OVER' | [X-OVER] | 'HP': '20Hz' '20kHz' 'LP': '20Hz' '20kHz' 'BUTTER-xx' (Butterworth), 'BESSEL-xx' (Bessel), 'LINK/R-xx' (Linkwitz-Riley), 'BYPASS' (Filter switched off) | Parameters for digital high pass and low pass: Cut-off frequency, slope and filter type |

Operating on the unit

| Param- eter | Button | Selection range | Meaning |
|----------------|-----------------|---|---|
| 'GATE' | [COMP/ GATE] | 'T': '-90dB''-0dB' 'HT': '10''999' (in milliseconds) 'AT': '1ms''999ms' 'RT': '10ms''3000ms' | Parameters for the noise gate: Threshold, hold, attack, release |
| 'PHASE' | [PHASE] | '0', '180' | Inversion of phase length |

Output settings

- **1.** Press the *[EDIT]* button assigned to the desired channel.
 - \Rightarrow The settings menu for the desired channel will open. The display shows 'GAIN'.
- **2.** In the basic state of the menu, you can set the level of the channel within a range of -60 dB...+12 dB using the jog wheel.
- **3.** Press the respective button to set further parameters for the channel.

Use the jog wheel to set the desired value of the parameter. Press the jog wheel to confirm.

The table below shows the available parameters and their ranges.

| Param- eter | Button | Selection range | Meaning |
|--------------------|------------------|--|---|
| 'PEQ' | 1 × [PEQ/GEQ] | <pre>'PEQ': '1' '9' 'F': '20Hz' '20kHz' 'Q': '0.4' '128' 'G': '-12dB' '+12dB' 'Style': 'PEAK', 'L-SHLF', 'H-SHLF', 'LP6dB', 'LP12dB', 'HP6dB', 'HP12dB', 'A-PAS1', 'A-PAS2' 'ON', 'BP'</pre> | For 9 frequency bands (numbered with the parameter ' <i>PEQ</i> '), the parameters of the parametric equalizer can be set individually: Centre frequency, filter quality, slope, filter type, bypass |
| ʻINLINK' | [LINK] | | The settings of several output channels can be linked to each other. The number of output chan- nels depends on the device design. |
| 'DELAY' | [DELAY] | '0ms' '680ms' '0m' '234m' '0ft' '766ft' | Delay time. The units that are displayed depends on the device's default setting. |
| 'X-OVER' | [X-OVER] | 'HP': '20Hz' '20kHz' 'LP': '20Hz' '20kHz' 'BUTTER-xx' (Butterworth), 'BESSEL-xx' (Bessel), 'LINK/R-xx' (Linkwitz-Riley), 'BYPASS' (Filter switched off) | Parameters for digital high pass and low pass: Cut-off frequency, slope and filter type |
| 'MATRIX' | 1 × ′MATRIX′ | | Selection of the assignment of the input channels to the respective output channel. Each output channel can be freely assigned to one input channel or a mix of several input channels. The selected input channels are marked with ' χ '. |
| 'MATRIX Output' | 2 × 'MATRIX' | '-60dB''+0dB' | One level adjustment can be set for each of the input channels assigned to the respective output channel. |

thomann MUSIC IS OUR PASSION

Operating on the unit

| Param- eter | Button | Selection range | Meaning |
|----------------|------------------------|---|---|
| 'GATE' | 1 × [COMP/ GATE] | 'T': '-90dB''-0dB' 'HT': '10ms''999ms' 'AT': '1ms''999ms' 'RT': '10ms''3000ms' | Parameters for the noise gate: Threshold, hold, attack, release |
| 'LIMIT' | 2 × [COMP/ GATE] | 'TH': '-90dB' '+20dB' 'AT': '1ms' '999ms' 'RT': '10ms' '3000ms' | Parameters for the limiter: Threshold, attack, release |
| 'PHASE' | [PHASE] | '0', '180' | Inversion of phase length |

7 Control on the computer

Installing and starting the software

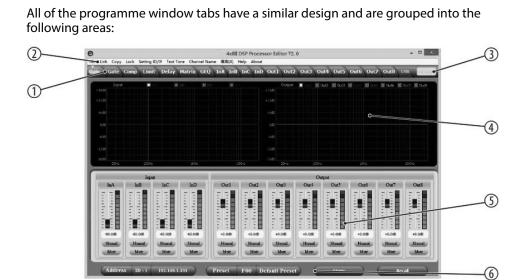

- **1.** Place the CD with the software into the CD drive of a computer with a Windows operating system and start the installation programme that matches the device you have.
- **2.** Follow the instructions of the installation programme until it is finished.
- **3.** Connect your computer via a USB cable to the device and switch the device on.
 - ⇒ The operating system recognizes the newly added USB device.
- **4.** Open the computer programme. It automatically recognized the attached device.
 - ⇒ The 'Online' marking will appear in the upper right corner of the programme window.

Closing the software

- **1.** Click on the 'Online' button in the programme window.
- **2.** Close the programme window.

| Range | Meaning |
|--------------|---|
| Display area | Shows the current configuration of input to output channels. Output and input channels can be renamed. Click on a function area (e.g. ' <i>GEQ</i> ' or ' <i>DELAY</i> ') to open the tab in which you can directly enter the corresponding parameters. |
| Control area | By clicking with the mouse you can connect any input channel to any output channel. Each output channel can be freely assigned to one input channel or a mix of several input channels. The input channels with a green background are assigned to the respective output channel. You can set a level adjustment for any combination of input and output channel. |

"GEQ" tab

| Range | Meaning |
|--------------|---|
| Display area | Shows the setting of the graphic equalizer for the selected input channel. Click on the 'EQ Bypass' button to temporarily switch off the equalizer function for this channel or on the 'EQ Reset' button to return the equalizer to its basic status. |
| Control area | Drag the fader with the mouse to set the boost or cut for each of the available frequency bands. To select a channel, click on the buttons $(InA',(InD')$. The number of input channels depends on the device design. |

9 Plug and connection assignment

Introduction

This chapter will help you select the right cables and plugs to connect your valuable equipment in such a way that a perfect sound experience is ensured.

Please note these advices, because especially in 'Sound & Light' caution is indicated: Even if a plug fits into the socket, an incorrect connection may result in a destroyed power amp, a short circuit or 'just' in poor transmission quality!

XLR plug (balanced)

| 1 | Ground, shielding |
|---|------------------------------------|
| 2 | Signal (in phase, +) |
| 3 | Signal (out of phase, –) |
| 4 | Shielding on plug housing (option) |

10 Protecting the environment

Disposal of the packaging material

Disposal of your old device

For the transport and protective packaging, environmentally friendly materials have been chosen that can be supplied to normal recycling.

Ensure that plastic bags, packaging, etc. are properly disposed of.

Do not just dispose of these materials with your normal household waste, but make sure that they are collected for recycling. Please follow the notes and markings on the packaging.

This product is subject to the European Waste Electrical and Electronic Equipment Directive (WEEE) in its currently valid version. Do not dispose with your normal household waste.

Dispose of this device through an approved waste disposal firm or through your local waste facility. When discarding the device, comply with the rules and regulations that apply in your country. If in doubt, consult your local waste disposal facility.
