## Signalled Preconfigurations

Please note that your Signalled sign has been preconfigured for the following operation, depending on the sign chosen

Please note that your SignalLED sign has been preconfigured for the following operation, depending on the sign chosen

SIGNALLED PRECONFIGURATIONS

Top Level Part Number	Slave	Master (Side with connections)	No Input	Input 1	Input 2	Both Inputs
LD-20F1MCL		MIC LIVE	Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-20F1ONA		ON AIR	Turns the sign off	Turns the whole sign solid green when connected to 0V	Turns the whole sign solid red when connected to 0V	Turns the sign off
LD-20F1REC		RECORD	Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40E1MCL	MIC LIVE		Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40E1ONA	ON AIR		Turns the sign off	Turns the whole sign solid green when connected to 0V	Turns the whole sign solid red when connected to 0V	Turns the sign off
LD-40E1REC	RECORD		Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40F1ADB	AD BREAK		Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40F1DOR	DOOR		Turns the sign off	Turns the whole sign solid blue when connected to 0V	Turns the whole sign solid red when connected to 0V	Turns the sign off
LD-40F1EXIT	EXIT		Turns the sign off	Turns the whole sign solid green when connected to 0V	Turns the whole sign solid red when connected to 0V	Turns the sign off
LD-40F1INT	INTERVIEW IN PROGRESS		Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40F1MCL	MIC LIVE		Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40F1MET	MEETING IN PROGRESS		Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40F1NOE	NO ENTRY		Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40F1OBT	OBIT		Turns the sign off	Turns the whole sign solid magenta when connected to 0V	Turns the whole sign solid white when connected to 0V	Turns the sign off
LD-40F1ONA	ON AIR		Turns the sign off	Turns the whole sign solid green when connected to 0V	Turns the whole sign solid red when connected to 0V	Turns the sign off
LD-40F1PHN	PHONE		Turns the sign off	Turns the whole sign solid yellow when connected to 0V	Turns the whole sign solid white when connected to 0V	Turns the sign off
LD-40F1REC	RECORD		Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40F1REH	REHEARSAL		Turns the sign off	Turns the whole sign solid blue when connected to 0V	Turns the whole sign solid red when connected to 0V	Turns the sign off
LD-40F1SIL	SILENCE		Turns the sign off	Turns the whole sign solid red when connected to 0V	Turns the whole sign solid orange when connected to 0V	Turns the sign off
LD-40F1TRF	TRAFFIC FLAG		Turns the sign off	Turns the whole sign solid orange when connected to 0V	Turns the whole sign solid green when connected to 0V	Turns the sign off
LD-40F2ONA-MCL	ON AIR	MIC LIVE	Turns the sign off	Turns the MIC LIVE segment solid red when connected to 0V	Turns the ON AIR segment solid green when connected to 0V	Turns the MIC LIVE segment solid red and the ON AIR segment solid green when connected to 0V
LD-40F2ONA-SIL	ON AIR	SILENCE	Turns the sign off	Turns the SILENCE segment solid orange when connected to 0V	Turns the ON AIR segment solid red when connected to 0V	Turns the SILENCE segment solid orange and the ON AIR segment solid red when connected to 0V
LD-40F2TX-REH	TX	REH	Turns the sign off	Turns the REH segment solid blue when connected to 0V	Turns the TX segment solid red when connected to 0V	Alternates REH in solid blue, TX in solid red
