Sequencer Compatibility Chart

The chart below outlines the MacOS and Windows 64-bit operating systems and sequencers that are officially supported (fully tested) with the latest version of Play 6. Please contact support for questions related to compatibility with earlier versions of Play, and please note that while 64-bit sequencers (DAWs) that use VST, VST3, AU and AAX plugin formats may work fine, only those listed in the chart below are officially supported.

¹ MacOS 64-bit Operating Systems 10.8 through 10.14 are officially supported. For current compatibility with MacOS 10.15 (Catalina), please follow the link.

Please note! 32-bit Sequencers and Operating Systems are only supported by Play 4, the last version of Play that was released with a 32-bit installer. Please be aware that Play Libraries released on Play 6 are <u>not</u> compatible with older versions of Play. Please contact support for more information.

² Windows 7 support is officially being ended by Microsoft on January 14th, 2020.

³ Ableton Live 10 requires MacOS 10.11.6 or above.

⁴ **Pro Tools 10** users require Play version 4 (32-bit). Please contact support for details.
