Use Regroover to:

- Unmix your loops into distinct sound layers.
- Get previously unheard sounds from inside your loops.
- Craft the isolated beat elements and form your unique rhythmic signature.

Regroover Pro Only Features:

- Grab the magic kick, snare or clap and place it on its own trigger pad.
- Or Build your own Expansion Kit with any element inside your loop which makes for rapid-fire MIDI triggering of samples to make new beats and grooves.
- Create Regroover Projects with both external and found sounds from inside your loops.

Version Comparison
