

FF2.2 2+ CHANNEL MIXER

The FF2.2 was designed with Funktion One to be one of the best analogue signal path mixers in the world.

Channel 1 & 2 inputs are Line and Phono, channel 3 is on balanced 1/4" 3 pole jack sockets.

There is also a Mic input that may be set to Booth mix or post Booth mix.

The FF2.2 has been designed to have the best Phono input performance on a 2 channel mixer.

The Phono input has four input capacitance settings to optimise matching to cartridge.

Each channel has 2 inputs, 12 LED meter, 4 band full kill EQ, FX loop and adjustable high and low pass filters.

The low pass filter is adjustable from 20Khz to 1Khz and the high pass from 20Hz to 1Khz.

The output section includes master, booth, cross fader curve, FX wet/dry and headphone controls plus metering for booth and master.

The Phono amp is a 2 stage design with near ideal RIAA tracking characteristic.

Each Phono input has switchable rumble filter and noise cancelling.
