

Declaration of no-objection

“Stairville” fog fluids (“E”, “E-C”, “E-HD”, “E-M”, “F-F”, „PSS“, „PHF“, „RDF“)

The products are water-based universal fog fluids which are deployed to generate artificial (effect) fog. They can be used in every customary fog machine that is operated with water-based fluids.

The products are not classified as hazardous materials in terms of the Ordinance on Hazardous Materials, the EU Directive for Hazardous Materials, the EU regulation 67 / 547 / EEC as well as the national and international transportation regulations for overland, maritime or air transport.

The raw materials used feature highest possible purity each. The contained water is twice distilled and chemically and microbiologically pure, hence extending the lifespan of the devices used.

The products are non-flammable; classification in any hazard classes for liquids: not applicable.

An irritant effect which may lead to an inflammation of the skin or the mucous membranes does not exist.

The products are quickly biodegradable, and they are classified as “readily biodegradable” in the modified OECS Screening Test according to the OECD classification.

The products act unobjectionably in sewages, malfunctioning of waste water purification systems is not to be expected.

The products are completely water-soluble.

All indications reflect our current state of knowledge and refer to an adequate usage in the delivery condition.
