

## HD572 MONITORING HEADPHONES

### Description

The HD572 is a supra-aural close-back headphones, which offer better isolation from ambient noise and feature high sound pressure level capability and exceptional comfortable fit. The HD572 features a powerful bass punch, expressly designed to convey the power of drums, while the enhanced mid and high frequencies give high resolution and detail, working well even in noisy environments.

The folding swing-arms allow for one-sided monitoring and will fold into a small package that takes almost no space in your bag. All these features plus a wide, comfortable, moulded and detented adjustable headband, make these headphones ideal for studio and DJ use. The ruggedly constructed HD572's comfort level is as impressive as its powerful low end and accurate sonic imaging.

### Features
