

- transparent 5-segment panel for sound shielding on stage or in recording studios
- perfect for shielding a 5-piece drumset
- easy handling due a folding in concertina style
- dimensions (W × H – each panel): 600 mm × 1660 mm
- thickness (each panel): 55 mm
- weight: approx. 36 kg
- material: acrylic
- colour: transparent

- While assembling, pay attention to the direction of the hinges, otherwise the five panels can not be folded completely (see figure ①).
- Use lubrication for easing the insertion of the hinges.
- While assembling the hinges, use a rubber hammer and a hard block for avoiding damages of the hinges (see figure ②).

Ensure that plastic bags, packaging, etc. are disposed of properly and are not within reach of babies and young children. Choking hazard!

Due to the heavy weight of the product, at least two persons are required for transport and installation.

If placed on soft or uneven ground, the panel may overturn and cause injuries and property damage. Place the panel on flat and solid surfaces only.

When folding in and out the panel, pay attention not to squeeze your fingers/hands.

For the transport and protective packaging, environmentally friendly materials have been chosen that can be supplied to normal recycling. Ensure that plastic bags, packaging, etc. are properly disposed of. Do not just dispose of these materials with your normal household waste, but make sure that they are collected for recycling. Please follow the notes and markings on the packaging.
